

2020

"Healthcare Development"

GP - 1

1. State program "Healthcare development"

1.1. State program "Healthcare Development" (hereinafter referred to as GP-1, state program)

approved by the Decree of the Government of the Russian Federation of December 26, 2017.

№ 1640.

According to the draft passport GP-1, presented in the materials for the bill

(hereinafter referred to as draft passport GP-1):

implementation period: 2018 - 2024;

The responsible executor is the Ministry of Health of Russia, co-executors are 8 departments¹, participants in the procedural part – 102, design part – 163.

1.2. The current version of GP-1 approves 8 directions (subprograms)⁴.

The bill provides for budgetary allocations from the federal budget for implementation of 8 directions (subprograms).

The national project "Healthcare" is included in *the design part* of GP-1 (hereinafter referred to as the National Project), which reflects in the form of structural elements 8 federal projects ("Development of the primary health care system") assistance"; "Fight against cardiovascular diseases"; "Fight against oncological diseases"; "Development of children's health care, including the creation of modern infrastructure for providing medical care to children"; "Provision of medical organizations of the healthcare system with qualified personnel"; "Development of the network national medical research centers and the implementation of innovative medical technologies"; "Creation of a single digital circuit in healthcare on the basis of the unified state information system of health care (EGISZ)"; "Development of export of medical services").

¹ Ministry of Health of Russia, Ministry of Labor of Russia, Federal Medical and Biological Agency of Russia, Rospotrebnadzor, Presidential Executive Office of the Russian Federation, Rosaviatsia, Roszdravnadzor, Mandatory Medical Insurance Fund.

² Ministry of Health of Russia, Ministry of Education and Science of Russia, Ministry of Agriculture of Russia, Ministry of Finance of Russia, Federal Medical and Biological Agency of Russia, Federal Compulsory Medical Insurance Fund, Fund Social Insurance Fund of the Russian Federation, Rospotrebnadzor, Rospechat, and the Ministry of Defense of Russia.

³ Ministry of Health of Russia, Ministry of Agriculture of Russia, Ministry of Labor of Russia, Ministry of Finance of Russia, Federal Medical and Biological Agency of Russia, Federal Compulsory Medical Insurance Fund, Federal Bailiff Service of Russia, Ministry of Education and Science of Russia, Lomonosov Moscow State University, Federal Penitentiary Service of Russia, Rosavtodor, Ministry of Economic Development of Russia, Federal Antimonopoly Service of Russia, Federal Tax Service of Russia, Ministry of Foreign Affairs of Russia, Federal Property Management Agency.

⁴ "Improving the provision of medical care, including disease prevention and the formation of healthy lifestyle"; "Development and implementation of innovative methods of diagnostics, prevention and treatment, as well as the basics of personalized medicine"; "Development of medical rehabilitation and spa treatment, including for children"; "Development of human resources in healthcare"; "Development of international relations in the field of health care"; "Expertise and control and supervisory functions in the field of health care"; "Medical and sanitary support of certain categories of citizens"; "Information technology and management of industry development".

In addition, the structure of *the design part* of GP-1 includes 2 federal projects, implemented within the framework of the national project "Demography" ("Strengthening public health"; individual events of the federal project "Senior generation").

The process part of GP -1 includes 24 departmental target programs (hereinafter referred to as VCP), developed on the basis of the main activities.

The development and approval of the VCP projects was carried out in accordance with the Regulation on the development, approval and implementation of departmental target programs, approved by the Decree of the Government of the Russian Federation of April 19, 2005 No. 239.

The draft passport of GP-1 is **generally balanced** in terms of objectives. The objectives of GP-1 correspond the goals and objectives provided for in the Address of the President of the Russian Federation To the Federal Assembly of the Russian Federation of January 15, 2020, as well as the Decree President of the Russian Federation of May 7, 2018 No. 204 "On national goals and strategic objectives for the development of the Russian Federation for the period up to 2024" (hereinafter referred to as Decree No. 204) and strategic planning in the relevant area of activity.

The draft passport of GP-1 sets **4 goals** at the level of the state program and their values years of implementation:

reducing mortality among the working-age population to 350 cases by 2024 per 100 thousand population;

reduction of mortality from diseases of the circulatory system to 2024 450 cases per 100 thousand population;

reduction by 2024 of mortality from neoplasms, including from malignant, up to 185 cases per 100 thousand population;

reducing infant mortality to 4.5 cases per 1,000 live births by 2024 alive.

At the same time, the absence of indicators of mortality from all causes, expected life expectancy, disability rates, population satisfaction with quality and availability of medical care in the GP-1 passport indicates incomplete compliance with strategic planning documents, namely paragraph 71 of the Strategy national security of the Russian Federation (Decree of the President of the Russian Federation from December 31, 2015 No. 683) - "Increasing life expectancy", "Reducing the level of disability and mortality of the population", "Increase in population size", "Increase in availability and quality of medical care."

Information on goals, objectives and values of target indicators

The strategic planning documents are presented in the following table.

Objectives, tasks and target indicators (indicating values, if any) of the main strategic documents (indicated for each strategic document separately)	Objectives and target indicators reflected in the draft passport GP-1
Decree of the President of the Russian Federation of May 7, 2018 No. 204 "On national goals and strategic objectives for the development of the Russian Federation for the period up to 2024" (as amended by Decree of July 21, 2020 No. 474): paragraph 4 of the Decree: "When developing a national project in the field of healthcare, the Government of the Russian Federation should proceed from the fact that in 2024 it is necessary to ensure: reduction of mortality rates among the working-age population (up to 350 cases per 100,000 population), mortality from diseases of the circulatory system (up to 450 cases per 100,000 population), mortality from neoplasms, including malignant ones (up to 185 cases per 100,000 population), infant mortality (up to 4.5 cases per 1,000 births)." Strategy for the development of healthcare in the Russian Federation for the period up to 2025, approved by the Decree of the President of the Russian Federation of June 6, 2019. Article 254: point 35 of the Strategy: "The expected results of the implementation of the second stage of the Strategy by 2025 are (compared to 2017): 1) reduction of infant mortality to 4.5 cases per 1,000 live-born children (5.6 cases); 2) reduction of mortality among people of working age to 350 cases per 100 thousand people of the corresponding age (484.5 cases); 3) a decrease in mortality from diseases of the circulatory system to 450 cases per 100 thousand people (587.6 cases); 4) a reduction in mortality from neoplasms, including malignant ones, to 185 cases per 100 thousand people (200.6 cases)"	Goal 1 – "Reducing the mortality rate of the working-age population to 350 cases per 100 thousand population by 2024"; in 2018 - 455 per 100 thousand population; in 2019 - 437 per 100 thousand population; in 2020 - 419 per 100 thousand population; in 2021 - 401 per 100 thousand population; in 2022 - 383 per 100 thousand population; in 2023 - 365 per 100 thousand population; in 2024 - 350 per 100 thousand population; Goal 2 – "Reduce mortality from diseases of the circulatory system to 450 cases per 100 thousand by 2024. population"; in 2018 - 565 per 100 thousand population; in 2019 - 545 per 100 thousand population; in 2020 - 525 per 100 thousand population; in 2021 - 505 per 100 thousand population; in 2022 - 485 per 100 thousand population; in 2023 - 465 per 100 thousand population; in 2024 - 450 per 100 thousand population; Goal 3 – "Reduce mortality from neoplasms, including malignant ones, to 185 cases per 100 thousand population by 2024"; in 2018 - 199.9 per 100 thousand population; in 2019 - 199.5 per 100 thousand population; in 2020 - 197 per 100 thousand population; in 2021 - 193.5 per 100 thousand population; in 2022 - 189.5 per 100 thousand population; in 2023 - 187 per 100 thousand population; in 2024 - 185 per 100 thousand population; Goal 4 – "Reduce infant mortality to 4.5 cases per 1,000 live births by 2024"; in 2018 - 5.5 per 1,000 live births; in 2019 - 5.4 per 1,000 live births; in 2020 - 5.2 per 1,000 live births; in 2021 - 5 per 1,000 live births; in 2022 - 4.8 per 1,000 live births; in 2023 - 4.6 per 1,000 live births; in 2024 - 4.5 per 1,000 live births

The objectives and target indicators of the GP-1 passport project are mainly correspond to the goals and targets of strategic planning documents in the healthcare sector.

1.3. Information on financial support for GP-1 in 2019 - 2023 at the expense of funds federal budget, consolidated budgets of the constituent entities of the Russian Federation and legal entities are presented in the following table.

* According to the Consolidated Annual Report on the Progress of Implementation and Evaluation of the Effectiveness of State Programs for 2019.

** The volume of funds is indicated in accordance with the draft passport GP-1 without taking into account inter-budget transfers.

*** The volume of budgetary allocations to the Federal Compulsory Medical Insurance Fund is indicated in accordance with the draft passport GP-1, taking into account inter-budget transfers from the federal budget.

An analysis of the data for 2019 presented in the table showed that the level financing of GP-1 activities from the consolidated budgets of the subjects

The Russian Federation accounted for 29.9% of the envisaged volume. At the same time, the execution expenses are 17.5% lower than the level stipulated by the GP-1 passport. The facts stated indicate insufficient quality of planning of financial sources ensuring GP-1 during its formation.

According to the draft passport in 2021 - 2023 (appendix to the bill) the implementation of GP-1 activities is planned at the expense of the federal budget, consolidated budgets of the constituent entities of the Russian Federation, budgets state extra-budgetary funds of the Russian Federation. Information on the implementation activities at the expense of other sources in the composition of materials for the bill are not presented.

1.4. Information on financial support for GP-1 from the federal budget in 2019–2023 are presented in the following table.

* If they are separated in the draft passport of the state program.

** The approved budget allocations for the subprograms are presented in accordance with Appendix 15 to the Federal Law of November 29, 2018 No. 380-FZ "On the federal budget for 2020 and for the planning period of 2021 and 2022" (as amended).

*** Resolution of the Government of the Russian Federation of December 26, 2017 No. 1640 "On approval of the state program The Russian Federation's "Healthcare Development" does not contain information on federal budget allocations provided for the implementation of subprograms.

**** The program passport and the draft passport do not contain information about the financial support of the subprograms.

The volume of financial support for the implementation of GP-1 at the expense of federal funds the budget in the draft passport GP-1 corresponds to the budgetary allocations, provided for by the bill.

As of **September 1, 2020, with an increase in** budget allocations for GP-1 consolidated list of **204,084.0 million rubles**, or 24.1%, compared with the Federal Federal Law No. 380-FZ with amendments (847,476.8 million rubles), based on the results of 8 months of the current year **cash execution of** federal budget expenditures for 2020 under GP-1 **amounted to 709,707.3 million rubles, or 67.5%** of the consolidated budget. In 2020, the execution Federal budget expenditures under GP-1 were carried out by 24 main administrators budget funds. The main share of financial support for the implementation of GP-1 activities falls to the Russian Ministry of Health (32% of the consolidated list with changes), the Ministry of Finance of Russia (23.7%), Rospotrebnadzor (4.1%) and FMBA of Russia (3.4%). In 2019, the implementation amounted to 551,615.8 million rubles, which is 29,070.5 million rubles, or 5%, less than the indicator consolidated list (580,686.3 million rubles).

The bill provides for budgetary allocations from the federal budget for the implementation of 8 subprograms of GP-1: "Improving the provision of medical assistance, including disease prevention and the promotion of a healthy lifestyle," "Development and implementation of innovative methods of diagnostics, prevention and treatment, as well as also the foundations of personalized medicine", "Development of medical rehabilitation and spa treatment, including for children", "Development of human resources in health care", "Development of international relations in the field of health care", "Expertise and control and supervisory functions in the field of health protection", "Medical sanitary provision of certain categories of citizens", "Information technologies and "management of industry development".

As part of the implementation of GP-1, the bill provides for budgetary federal budget allocations for the implementation of 8 federal projects included in composition of the national project "Healthcare".

The budgetary allocations provided for in the draft law for the implementation of GP-1, in In 2021, they will amount to 857,977.5 million rubles, in 2022 – 855,833.3 million rubles, in 2023 – 816,670.0 million rubles.

The bill provides financial support for GP-1 at the expense of the federal budget

increases compared to the approved GP-1 in 2021 by 70,336.6 million rubles, or 8.9% in 2022 or 20.9%.

Information on financial support for GP-1 in 2019-2023 at the expense of funds

The federal budget for subprograms is presented in Appendix No. 4 to the Conclusion.

If budget allocations are executed at less than 70% for 8 months of 2020:

subprogram "Information technologies and management of industry development" (31.4 % of the consolidated budget indicator for 2020) by the draft law for 2021 budget appropriations for this subprogram **have been reduced** by 1,335.3 million rubles, or by 8.6% compared to Federal Law No. 380-FZ (with amendments) (from 15,596.3 million rubles to 14,234.0 million rubles). At the same time, the main reduction in budgetary allocations for federal project "Creation of a single digital circuit in healthcare based on Unified State Health Information System (EGISZ)" from 13,440.2 million rubles to 12,096.2 million rubles, primarily due to the provision of inter-budgetary transfers for the implementation of regional projects "Creation of a single digital circuit in healthcare based on a unified state information system health care (EGISZ)". Expenses were reduced from 11,214.1 million rubles to 10,092.8 million rubles;

subprogram "Development of medical rehabilitation and health resort treatment, including for children" (62.8% of the consolidated budget estimate for 2020) The 2021 bill **increases** budget allocations for this subprogram by 1,085.0 million rubles, or 5.1%, compared to Federal Law No. 380-FZ (from changes) (from 21,439.2 million rubles to 22,524.2 million rubles);

subprogram "Medical and sanitary support for certain categories of citizens" (63.9% of the consolidated budget for 2020) by the draft law for 2021 budget appropriations for this subprogram **are increasing** by 614.3 million rubles, or 1.6%, compared to Federal Law No. 380-FZ (with amendments) (from 39,224.3 million rubles to 39,838.6 million rubles);

subprogram "Improving the provision of medical care, including prevention of diseases and the formation of a healthy lifestyle" (67.0% of the indicator consolidated list for 2020) by the bill for 2020 budgetary allocations for this subprogram **will increase** by 73 million rubles, or 12%, compared to Federal Law No. 380-FZ (as amended) (from 615,656.8 million rubles to 689,540.2 million rubles).

With the execution of budget allocations exceeding 70% for 8 months of 2020 for:

subprogram "Development and implementation of innovative diagnostic methods, prevention and treatment, as well as the basics of personalized medicine" (74.2% of the indicator consolidated list for 2020) by the bill for 2021 budgetary allocations for this subprogram **are reduced** by 1,900.7 million rubles, or 6%, compared to

Federal Law No. 380-FZ (as amended) (from 31,998.5 million rubles to 30,097.8 million rubles);

subprogram "Development of human resources in healthcare" (82.7% of the indicator consolidated budget outline for 2020) by the draft law for 2021 budget appropriations for this subprogram **are reduced** by 1,043.8 million rubles, or 8.7%, compared to Federal Law No. 380-FZ (as amended) (from 11,978.9 million rubles to 10,935.1 million rubles);

subprogram "Development of international relations in the field of health protection" (72.4% of the consolidated budget estimate for 2020) by the draft law for 2021 budgetary allocations for this subprogram **are increased** by 70.3 million rubles, or by 7.9%, compared with Federal Law No. 380-FZ (as amended) (from 890.5 million rubles to 960.8 million rubles);

subprogram "Expertise and control and supervisory functions in the field of security health" (71.3% of the consolidated budget estimate for 2020) by the bill In 2021, budget allocations for this subprogram **are reduced** by 1,036.6 million rubles, or 2%, compared to Federal Law No. 380-FZ (as amended) (with 50,883.5 million rubles to 49,846.9 million rubles).

1.5. Analysis of the composition of indicators at the level of the state program and The subprograms of the GP-1 passport project showed the following.

1.5.1. The draft passport for GP-1 provides for 4 target indicators (indicator) at the level of the state program for 2021 - 2023, at the level of subprograms for 2021 - 2023 no indicators available⁷.

Information on the composition and dynamics of indicators of the state program presented in Table 1 "Information on the composition and dynamics of indicators of state programs of the Russian Federation in 2018-2023" appendix to subsection 8 Conclusions.

1.5.2. According to the data of the Consolidated Annual Report for 2020, **out of 4 main indicators of GP-1 planned values were achieved by 1.**

The planned values of **3** key indicators **were not achieved** :

"Mortality rate of the working-age population (per 100 thousand population of the appropriate age) (plan – 437.0, fact – 466.9), which is associated with the influence of social

economic factors such as high income inequality, persistent unemployment is still quite high (despite its decline in recent years) mortality rate among the working-age population;

"Mortality from diseases of the circulatory system (per 100 thousand population)" (plan 545.5, fact 573.7), which, according to the report of the Russian Ministry of Health, is associated with shortcomings in organization of medical care for patients with diseases of the system blood circulation, disruptions in the routing schemes for patients with acute coronary syndrome and acute cerebrovascular accident; organizational disunity of several emergency medical services, low coverage dispensary observation of patients with high and very high risk of cardiovascular vascular complications, shortage of specialists in the emergency medical service assistance in outpatient and polyclinic care, in intensive care and resuscitation departments therapy, in departments of X-ray surgical treatment methods, as well as with insufficient equipping medical organizations to carry out rehabilitation;

"Mortality from neoplasms (including malignant ones), per 100 thousand. population" (plan - 192.5 cases, fact - 201.5), the reasons for not achieving the indicator According to the Russian Ministry of Health, the reduction in mortality from neoplasms is: a shortage of oncologists in primary oncology clinics, as a result which is a decrease in the availability of medical care and a decrease in the indicator early detection; obsolescence of diagnostic and treatment equipment; lack of a unified information system that allows you to track the patient at all stages routing.

At the same time, proposals on the necessary measures to achieve the forecast target values (indicators) were not presented as part of the annual report.

In 2020, out of 4 target indicators, the planned values for 2020 established for all 4 indicators, **actual values are presented for 4 indicators (100 %).**

Indicator of the level of implementation of the indicators of the pilot program of the GP-1 and subprograms included in the structure of GP-1, in 2020 as part of the consolidated report of the Ministry of Economic Development absent.

In accordance with the draft passport GP-1 in 2021 - 2023 **the number of indicators (indicators) does not change - 4 indicators.**

At the same time, GP-1 does not provide for indicators that would allow for the implementation of monitoring the detection of cancer at early stages and monitoring preventive measures taken.

At the same time, the bill provides for **an increase in budget allocations.**
for 2021 by 70,336.6 million rubles (Federal Law No. 380-FZ budget appropriations for 2021 were approved in the amount of 787,640.9 million rubles, by the bill – 857,977.5 million rubles), in **2022** budget allocations for the implementation of GP-1 are expected to **decrease slightly** compared to 2021 by 2,144.2 million rubles (0.24%), in **2023 - decrease** compared to 2022 - by 39,163.3 million rubles (4,6 %).

The composition and values of target indicators of the state program for 2020 – The years 2023 according to the GP-1 passport project are presented in the following table.

Objectives of the state program					
target	unit measurements	target indicator values project			
		2020 year	2021 year	2022 year	2023 year
"Reducing mortality among the working-age population to 350 cases per 100 thousand by 2024. population"	Human	419	401	383	365
"Reduction of mortality from diseases of the circulatory system to 450 cases per 100 thousand population by 2024"	Human	525	505	485	465
"Reduction of mortality from neoplasms, including malignant ones, to 185 cases per 100 thousand by 2024. population"	Human	197	193,5	189,5	187
