Situation:

At least 7,000 patients with cleft conditions in Kenya still require primary cleft surgery and many more have not received the requisite secondary surgery or comprehensive care support such as nutrition, speech and dental because of the social and economic barriers encountered in accessing and receiving care.

Objectives:

The overall objective of the project is to increase Kenya's Health System's capacity to provide safe and free surgery for patients affected by cleft conditions. The project will support monthly surgical delivery programmes over a period of three years in OS Kenya's partner hospitals: Kenyatta National Hospital in Nairobi, Thika Level 5 Referral Hospital in Kiambu and Coast General Teaching & Referral Hospital in Mombasa.

Indicators:

Measures:

1. Develop partnerships with Community Health Workers and other local development actors to increase patient awareness campaigns;
2. Conduct surgical programmes to provide comprehensive cleft care services (surgeries, nutrition, speech and dental);
3. Work with Ministry of Health to build national cleft registry & disseminate to country health leadership;
4. Work with partner hospitals to identify, design and implement insurance schemes to reduce catastrophic expenditure for patients;
5. Train local medical volunteer staff in use and analysis of medical records, registries and other data at centres and partner hospitals;
6. Implement continuous professional development for healthcare professionals through volunteer deployment, physician exchanges and hospital training programmes;
7. Provide skills trainings in various cleft care specialties;
8. Ensure strong monitoring and evaluation system is in place;
9. Ensure partnerships with hospitals is strengthened;
