Guideline tree

SFAI's board together with the sub-associations are currently working on updating the medical guidelines. Do you want to announce outdated guidelines or contribute to medical development? Contact us at [sfai@sfai.se](mailto:riktlinjer@sfai.se?_x_tr_sl=auto&_x_tr_tl=en&_x_tr_hl=en&_x_tr_pto=wapp) (mailto:riktlinjer@sfai.se?_x_tr_sl=auto&_x_tr_tl=en&_x_tr_hl=en&_x_tr_pto=wapp) !

Guidelines/recommendations from SFAI, with sub-associations, are based on the best available evidence and state of the art at the time of the determination. They are indicative and provided in accordance with the European Union's definition of "recommendation" as a non-binding framework. Health care is a complex and changing business made up of many units with different conditions and needs. According to the law, it falls to the respective head of operations to ensure that local routines are in place to meet the patient's need for security, continuity, coordination and safety. It is up to all healthcare professionals to offer safe and individually adapted care according to science and proven experience.

NOTE! Several of our guidelines are under ongoing revision. Here you will find a compilation of all guidelines, responsible sub-association/board and planned update (https://sfai-se.translate.google.com/wp-content/uploads/2024/04/Riktlinjesammanställning-hemsidan.pdf?_x_tr_sl=auto&_x_tr_tl=en&_x_tr_hl=en&_x_tr_pto=wapp) . Guidelines marked in red are older guidelines where newer evidence/legislation is available and are under revision by the respective sub-association.

For instructions regarding the creation of guidelines, see SFAI's guideline management (https://sfai-se.translate.google.com/wp-content/uploads/2015/01/SFAIs_riktlinjehantering.pdf?_x_tr_sl=auto&_x_tr_tl=en&_x_tr_hl=en&_x_tr_pto=wapp) .
